Stainless appliances and well designed kitchen

Altogether a fitting place to call home.....added windows up above here and upstairs in the loft.

Full bath.....

Washer and dryer are not new which is why they are not "listed" and the Seller will have tested if you would like them to stay.

This is the actual "bedroom" shown here like an office or entertainment room

The space upstairs is huge and about 4' tall. Nicely carpeted as well

Looking down at this well designed space, from the loft

One more look at the covered porch and setting of the home. Private!
